1. OVERVIEW

- Mac driver 4.0 is the newest version of the Mac driver for KYOCERA printers and MFPs. It provides improved user experience through a number of UI enhancements.
- Mac driver 4.0 supports all functionalities provided in previous Mac drivers, plus the extended ability to save and reset common feature settings for specific installed printers.
- Data collection is integrated for the purpose of improving the software quality.
- The latest Mac OS Sierra is fully supported by this Mac driver 4.0, but Mac OS X 10.6 and 10.7 support have been dropped.
- Additional printer/MFP models are included in Mac driver 4.0 (as of April 2017).

2. NEW FEATURES

Mac driver4.0 is based on the previous Mac driver 3.3. (Regarding the details for Mac driver 3.3, please refer to its [Software Information](#).)

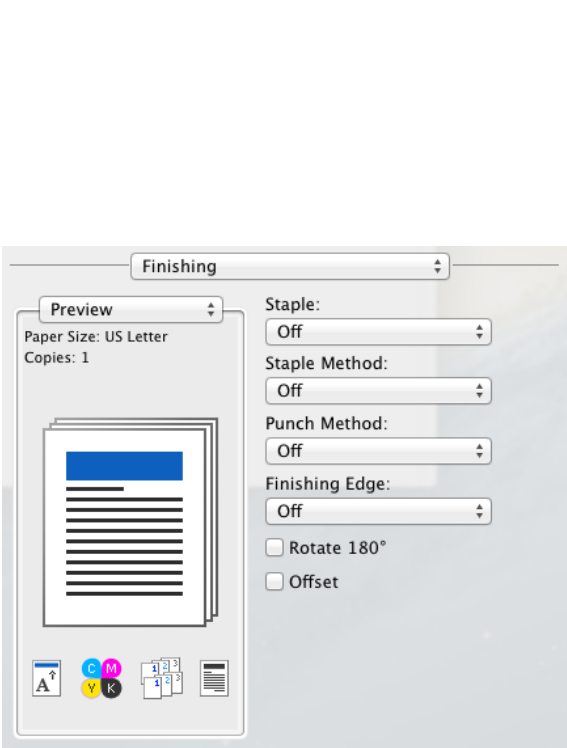

It provides New User Interface design through Mac driver 4.0.

Users can save print feature settings permanently per printer, or temporarily only to the current print job.

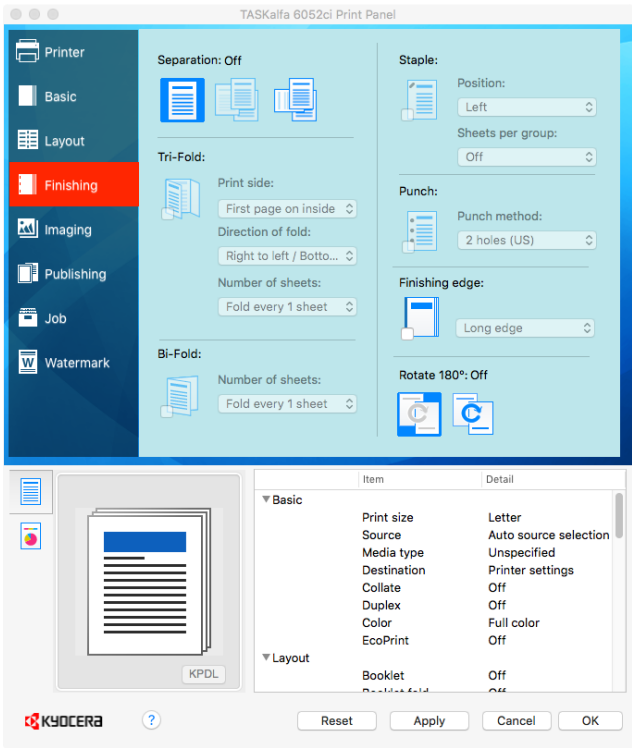

Data collection is integrated to for the purpose of improving the software quality.

1. New user interface design

The user interface of Mac driver 4.0 is designed based on the UI concept that gives you the idea of unification and is implemented across Kyocera products. The new design will have a similar look and feel for Kyocera products from device panels to drivers and utilities. The new design has colored tabs and colored dialog box background. New feature icons have bold highlights during icon selection.

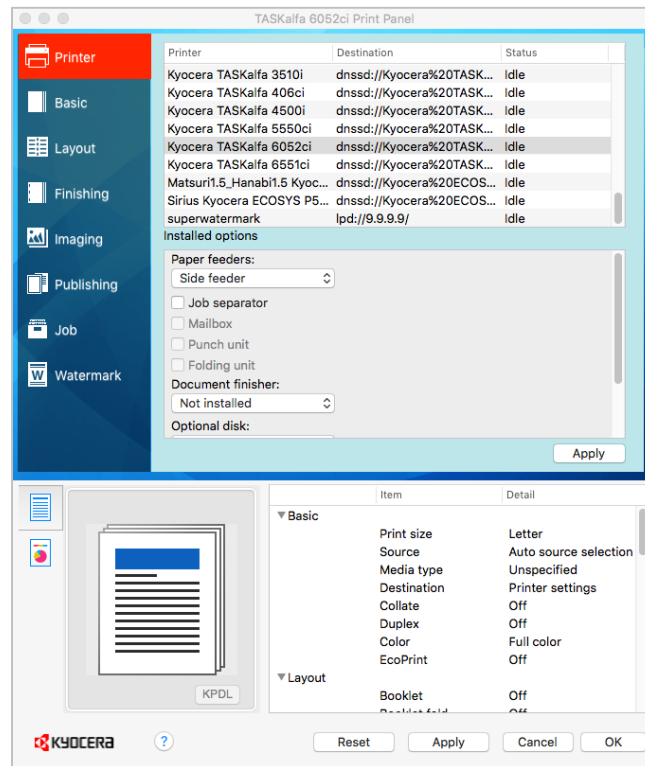

(Old) Mac driver 3.3 Interface

(New) Mac driver4.0 Interface

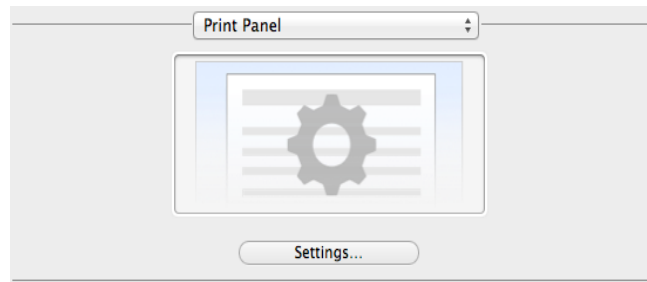

2. Print Feature Settings

The Mac driver 4.0 supports all functionalities provided in the previous Mac driver 3.3. It also supports extended ability to save common feature settings or reset to initial settings for specific installed printer instances. The feature settings can be permanently saved per printer, or temporarily saved to apply only to the current print job.

Launch Kyocera Print Panel directly for permanent settings

(How to: Click the “Finder” icon on the Dock, choose “Applications” from the drop-down list, and double click Kyocera Print Panel to launch)

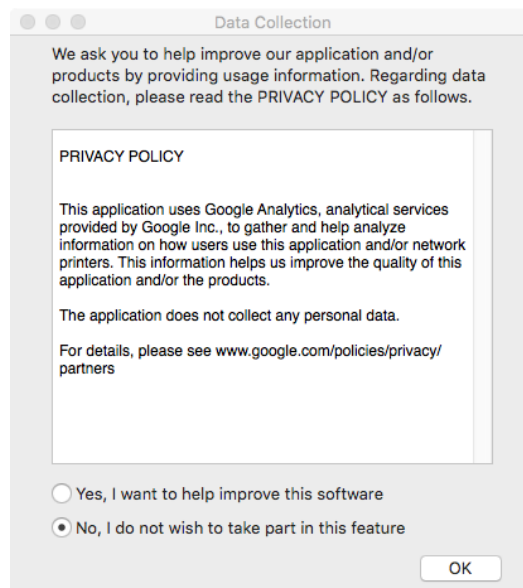

Launch from Print dialog to apply only to the current print job

(How to: launch Print Panel from print dialog side, and apply setting for the current print job)

3. Data Collection

To collect the information for the purpose of improving the software quality, telemetry is included in this version. Mac driver uses Google Analytics (GA) to collect data. Personal information is not included in the data sent to GA, and the data collection adheres to the latest Universal Analytics usage guidelines provided by Google. Users can enable this feature during installation and can change it through the Mac driver's "About" dialog box.

Note that Kyocera and TA/UTAX version excluding OEM version of Mac driver support the Data Collection feature.

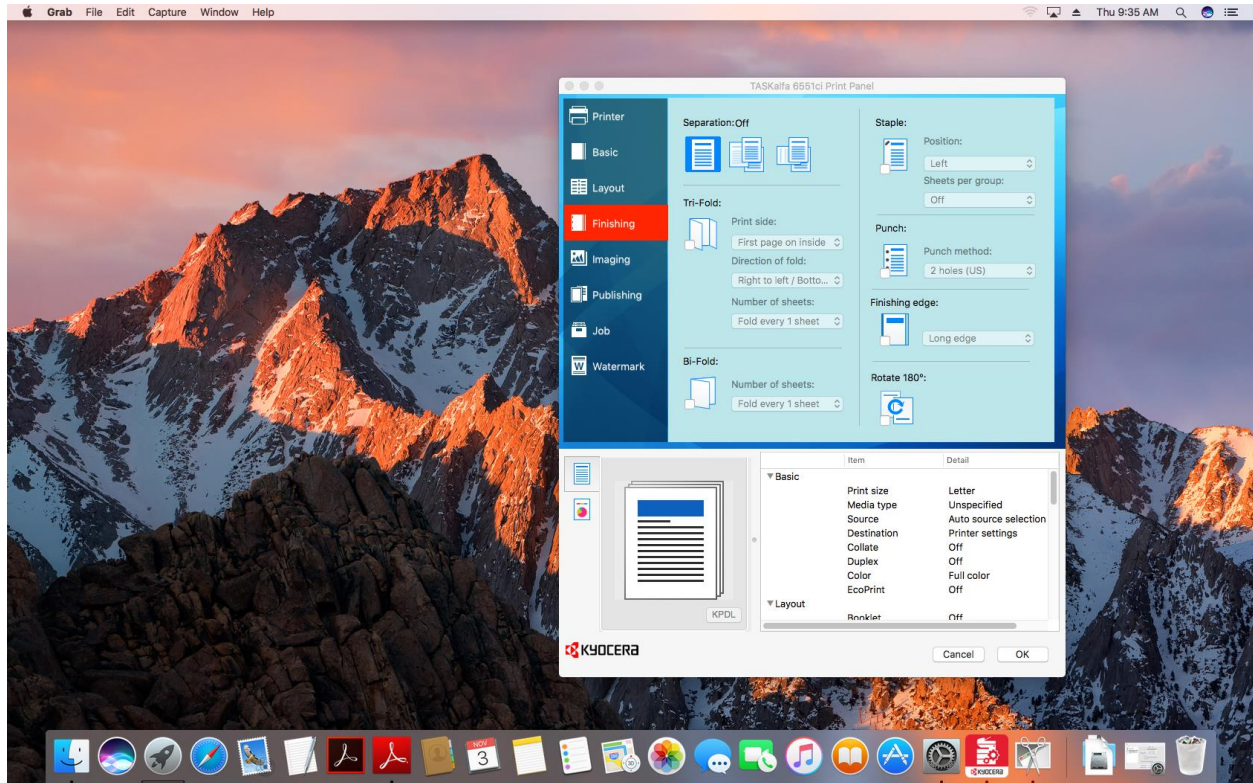

Data Collection Dialog

4. New Mac OS Support

The latest Mac OS Sierra (Mac OS 10.12) is fully supported by Mac driver 4.0.

Mac OS X 10.6 and 10.7 are dropped.

3. SUPPORTED LANGUAGES/ OS/ MODELS

1. Supported Languages

- English
- French
- German
- Italian
- Japanese
- Korean
- Portuguese
- Spanish

2. Supported Operating Systems

- Mac OS X 10.8 and later (as of April 2017)

3. Supported Device Models

Compared with the previous Mac driver, additional printer/MFP models are supported in Mac Driver 4.0.

Mac Driver 4.0 supports the following Kyocera models (as of April 2017):
